International Conference on the Software and Systems Process 2019

Doctural Track

For 2019, ICSSP is introducing a Doctoral Track for the first time. The track is intended to provide in-progress Ph. D. students with a chance to present their ongoing research to the entire ICSSP audience, to receive exposure and feedback, and generally draw on the collective wisdom of the ICSSP community to help advance their work.

Participation in the doctoral track requires submission of a short paper, authored solely by the student, describing the research topic, status, and plans, and also requires a supporting letter of recommendation from a faculty advisor. Students whose papers are accepted will make a brief presentation in the main track of ICSSP and will also present a poster in the ICSE common poster area. Accepted papers will be published in the ICSSP proceedings.

Paul Clarke, of Dublin City University and Lero, The Irish Software Research Centre, will serve as Chair for the Doctoral Track. The Call for Submissions and other information about the Doctoral Track can be found [here](#). **Note that submissions are required by 11 February.**

For comments, questions, or recommendations on the Doctoral Track of ICSSP 2019 please contact ICSSP2019DT at EasyChair.org.
